X-TOUCH ONE

Universal Control Surface with
Touch-Sensitive Motor Fader and
LCD Scribble Strip

- Universal DAW Remote Control for Studio and Live applications
- Supports HUI* and Mackie Control* protocols for seamless integration with every compatible music production software
- Various assignment presets that support every major DAW
- User preset that assigns any Mackie Control* parameters to user-preferred buttons
- Various standard MIDI modes with Note or CC assignments, and absolute or relative encoder operation
- Fully automated and touch-sensitive 100 mm motorized fader
- Dynamic LCD Scribble Strip for instant overview of track names and parameters
- Rotary control with LED-collar for on-the-fly pan adjustment
- 34 dedicated illuminated buttons for direct access of key functions
- 8-segment LED meter for precise level control
- Large jog/shuttle wheel and tape-style transport controls for intuitive operation
- 2-port powered multi-TT USB hub for connecting additional controllers
- Dedicated footswitch connector for external remote control

Lay your hands on your music with the X-TOUCH ONE Universal Control Surface. This brilliant controller has everything you need for your home studio or live setup, yet can grow as your needs expand.

From the touch-sensitive, motorized fader and dynamic LCD scribble strip, to the rotary encoder, 34 illuminated buttons, 8-segment LED meter, large jog/shuttle wheel and dedicated transport controls, the X-TOUCH ONE is a feature-packed surface for precision control and bird's eye view of your critical mix parameters.

Universally Yours

When it comes to integration, the X-TOUCH ONE has you covered with the most widely used protocols in the industry. With included support for HUI* and Mackie Control*, you can be sure it will work seamlessly with all compatible music production software, allowing you to focus on what counts... the music.

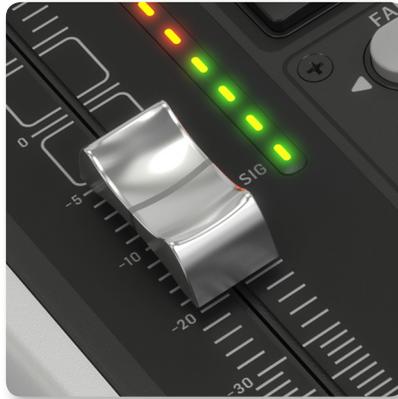

X-TOUCH ONE

Universal Control Surface with
Touch-Sensitive Motor Fader and
LCD Scribble Strip

- “Planet Earth” switching power supply for maximum flexibility (100 - 240 V~) and low power consumption for energy saving
- 3-Year Warranty Program*
- Designed and engineered in Germany

Labelled DAW Templates Included

The X-TOUCH ONE supports Mackie Control, HUI, and MIDI communication protocols for seamless integration with every compatible music production software. The text printed on the top panel corresponds to standard Mackie Control MC protocol. You also have the option of MC User mode, which allows you to assign specific MC functions to any of the buttons (except for the top five buttons in the Master/Channel section). To make it easy when working with the most popular compatible DAWs, we've included labelled overlay templates for your X-TOUCH ONE that indicate the typical button functions for each DAW.

Fader Dances with Your Music

Your music is the embodiment of your imagination and creativity. Your controller should be equally inspired and dynamic in its response to your creation. That's why the X-TOUCH ONE features a fully automated and touch-sensitive 100 mm motorized fader. Every move or automation you write can be seen in the fader movements in real time, perfectly synced with your DAW.

Touch-Sensitive Motor Fader and
LCD Scribble Strip

LCD Scribble Strip - Instant Readout

The onboard LCD scribble strip at the top of the fader provides an instant visual readout of which track and parameter you are adjusting – totally eliminating old school tape-and-marker labelling.

A Symphony of Lights

With 34 dedicated and illuminated buttons, a single rotary control with LED collar, an 8-segment LED meter and time code display, the X-TOUCH ONE is a feast for the eyes as well as the hands. You'll know in brilliant color if a channel is muted or soloed, and see how hot the level is pumping as you make changes during recording or mixing. Arm your track or adjust panning at the same time and marvel at how you ever relied on a mouse to do a controller's job.

The Feel

Navigation is a breeze with the abundant features on the X-TOUCH ONE's surface. The large jog/shuttle wheel and tape-style transport controls provide intuitive control over the most used actions in your DAW. Race between fader banks with the touch of a button and make changes by turning an actual control knob. It's like bringing your on-screen DAW controls to life!

Connect, Control, Expand

With class-compliant USB functionality, the X-TOUCH ONE is instantly recognizable by Mac and Windows PCs. The dedicated footswitch connector makes it ultra-easy to punch in and out, and serves as an additional option for external remote control. The powered multi-TT USB hub provides connectivity for additional USB devices, such as mouse, keyboard or additional controllers. Isn't that awesome?

Compose. Record. Mix. Share.

Tracktion is one of the world's fastest and easiest Digital Audio Workstations (DAW) for composing, recording, editing, mixing and sharing your music with the world. Featuring a single-screen interface, and pushing the envelope in design elegance, Tracktion brings together outstanding Pro DAW features, such as dynamic automation, unlimited track count, MIDI recording and support for VST and AU plug-ins. This powerful music production software gives you all the tools of an entire professional-grade recording studio. Learning a DAW has never been easier, thanks to their vast and readily available library of resources.

As our way of saying "Thank You", when you register your X-TOUCH ONE at behringer.com, we'll reward you with a complimentary download code for the full version of Tracktion. Recording and editing couldn't be easier. To learn more, visit tracktion.com/support/videos.

Share the Love. Visit tracktion.com for more.
